INTRODUCTION //

Since its establishment in Lozère in 2021, REV has been committed to sustainable development and has focused its efforts on food.

As Lozère is an unspoilt region with plenty of space for production, it is an ideal place to experiment with alternative food sources.

The association sources most of its food (honey, eggs, milk, cheese, yoghurt, bread, vegetables) from local producers, which is used to prepare meals for internal projects...

These meetings are an opportunity for locals and international volunteers to come together around a common project.

GOALS //

The seminar aims to explore how sustainable food can be used as an educational tool in youth work and community projects. It seeks to engage participants in reflecting on how to involve uninitiated audiences in sustainability issues, strengthen their competences in non-formal education, and exchange good practices between organizations. The project also aims to foster intercultural dialogue, collective learning, and future cooperation between partners.

SPECIFIC OBJECTIVES //

The program will be co-developed and tailored to participants' needs

- Workshop on our perceptions of food
- Mapping of supply and uses
- Cooking workshop
- Workshop on sharing practices
- Visit to producers

Workshops will be led by a professional trainer specialized in sustainable food

In a dynamic of non-formal education, participants will be able "to make and to live together" and each participant will be responsible for the daily life of the group. This tool is very important for a real encounter and to take into account interculturality and diversity of everyone.

Non formal education and active participation

COST //

FREE PARTICIPATION – Food and accomodation included. Travel expenses will be partially reimbursed according to the Erasmus+ distance calculator
