

Social and cultural itinerary in La Grange and Pic Saint Loup

Project date : 01-05-2020 / End of project : 30-11-2020 > 7 months > 2 volunteers

Host organization / Project leader : Co-coordination > BOUILLON CUBE and Communauté de communes du Grand Pic Saint Loup (CCGPSL) > France

Bouillon cube and the CCGPSL's youth service are carrying out a joint project to welcome volunteers in 2020 on the territory of the Grand Pic Saint Loup. This project, co-organized on the territory, will be based on their complementary skills, their networks of partners and their activities, articulated around a cultural axis and a youth axis.

We wish to continue to defend volunteer projects because they meet our own associative objectives of openness to others, openness to Europe, diversity of audiences and social inclusion, transversality of activities, networking at both local and European levels, meetings and exchanges. In this way, we want to develop the critical thinking skills of young people and equip them for the future.

The activities will be structured around 2 main thematic axes :

> 1/ Participate in the mediation and organization of cultural events at La Grange and Pic Saint Loup :

- Participate in the organization of the Bouillon cube cultural season for all audiences.
- Participate in the organization and animation of artistic education activities, in connection with the 2020 Bouillon cube cultural season, for all audiences
- Participate in the enhancement of activities through original and participatory modes of communication (photos, reports, interviews, videos...)

> 2/ Participate in the animation and organization of socio-cultural actions for the youth of the territory :

- Putting the 2 volunteers in contact with the young people of the CCGPSL territory through different times and different approaches (artistic workshops, mobility awareness, European games...)

In this context, volunteers will be called upon to intervene in the context of formal education (high schools, colleges, schools...) and non-formal education (associations, youth spaces...) and with young people in professional integration.

- Participate in the logistical, technical and educational organization of the CCGPSL youth festival, the "Festi'Jeun".

In addition to these 2 thematic axes, an individual time will be devoted to each volunteer's personal project so that everyone can invest in a personal project related to the project's objectives.

The main objectives of the project are to :

- fight discrimination, promote social inclusion and get to know and accept the other
- to raise awareness of mobility schemes and the European Union
- to promote the employability of young people, enrich them with experience and open up their horizons to opportunities for further study or professional integration
- foster creativity, openness and artistic and cultural practices
- enable the enhancement of skills and the involvement of participants (volunteers and young people from the region)
- to promote cooperation and territorial cohesion through a European mobility and popular education project

This project will be carried out with several partners :

- a permanent and regular partnership between Bouillon cube and the CCGPSL around European mobility activities and youth dynamics in Pic Saint Loup, since 2013.
- long-term partnerships with 2 identified sending structures with whom we have already worked
- solid partnerships with local stakeholders in both formal and non-formal education
- partnerships with companies and artists with whom we are used to working regularly

All the different logistical, pedagogical and administrative points are noted in the activity contract and validated beforehand with volunteers, sending partners and host structures. A partnership agreement will also be established with each project partner, in particular with the sending partners and with the CCGPSL partner, according to a precise division of tasks by structure.
