

PROJECT DETAILS

1. Title of the project
Different faces of sport.
2. What is the project about (why was such a topic chosen).
<p>The project is about different aspects of sport. We would like to analyse both its undeniable advantages as well as its drawbacks. We want to discuss with our potential partners whether sport always means health and if it integrates or rather divides people. Going further, we'd like to look at the issues concerning various forms of supporting favourite teams and, what follows, find out ways of preventing and eliminating aggression from sport in general. We are also interested in unusual forms of sport, especially national games played in the playground or sports which are combined with other areas of life (e.g. art). In addition, we want to know whether certain sports are stereotypically only for girls and others only for boys or if gender doesn't matter at all. Another aspect which we want to include in the project is connected with the importance of a proper diet – the topic which is worth comparing across cultures. Finally, we also want to fathom different forms of fitness as well as e-sport.</p> <p>We chose this particular topic because our students are good at sport and a lot of them are sport fans, both boys and girls. Therefore, we would like to analyse all possible aspects of it.</p>
3. Participants from Poland (age, school type, a number of people)
<p>The participants from Poland are all average teenagers attending a middle school in a small town called Prusice. They are between 13 and 16 years old for whom sport is one of the main interest. There are both boys and girls and gender doesn't discourage them from playing football or basketball. The group is composed of 11 students.</p>
4. Who are we looking for?
<p>We're looking for students, preferably from small towns or villages, who are also interested in sport and are at the same age as our students. The participants can be organised groups, associations, sports groups but also average students from middle schools like us. We would like to cooperate with three other countries – 11 participants and 2 leaders in each group.</p>
5. Time of the project
<p>We'd like to run the project from 9th September 2016 to 17th Sep 2016. It will take place in Wrocław – the capital city of Lower Silesia and one of the biggest cities in Poland. Before the project we will also organise a preparation visit with the leaders and discuss our ideas and priorities.</p>
